

I appreciate not having to answer calls that are from people selling their wares. I pay for my phone service for private use not for businesses to sell their products. I should not have to financially support their advertisements. I also feel the do not call list should be extended to Cell Phones. People have telephones for their personal convenience. With the states banning talking on the cell phones while driving, getting these annoying calls can cause an accident.

I would like to see the Federal Government enact a Do Not Call Law stricter than the NJ one. Thank you.
